Subject: No on Phillips 66 Oil Terminal!

Dear SLO Planning Commission,

I am a 30+ year resident of Davis, CA and am grateful to live adjacent to the downtown core area.

The Phillips oil trains would transit along the edge of downtown Davis two blocks from my house in a densely populated area. Near the same location is the "cross-over" switch that can require trains to transit at 10 MPH and a major curve with a maximum speed of 30 MPH.

Over the years, I have witnessed a major derailment AND a jack-knifed train just up the block from my house and just a few blocks from downtown. We were very lucky that those freight trains did not contain toxic cargo!

Please follow Benecia's lead and do the right thing for up-rail communities and for the environment in general by voting NO on the Phillips 66 oil terminal.

Respectfully,
Cathy Forkas
Davis, CA
